

Spaltudaq Corporation, a privately-held biotechnology company based in Seattle, is focused on developing novel therapeutic antibodies for the treatment of cancer and infectious disease. The company's technology harnesses the power of the human immune system to identify target-specific monoclonal antibodies from human tissue samples. Come join a company on the move!

Associate Scientist/Scientist, High Throughput Screening

This individual will be responsible for high-throughput screening operations at Spaltudaq. We seek a seasoned HTS specialist who will provide mentorship to a small screening team and is also willing to work at the bench to process screens reproducibly and on schedule with subsequent data collection, analysis, and reporting. Significant experience with plate-handling automation such as the BC Biomek or Multimek workstations or the Matrix Platemate workstations in connection with protein-based screens (ELISA) and/or cell-based screens using the GE InCell or ABS FMAT instruments is required and experience with FACS is strongly preferred. This individual will have experience managing at least one direct report and will have routinely demonstrated the ability to interpret and report data in a consistent and reliable manner. This individual will also have the ability to work professionally and tactfully with co-workers and outside agencies, the ability to work accurately with close attention to detail, and the knowledge and experience in the correct handling of substances that are commonly found in a BSL-2 facility. Candidates must possess a BS with minimum of 10 year relevant experience, an MS with 8 years relevant experience or a PhD in a relevant scientific discipline with 0-2 years post-graduate experience to qualify. Spaltudaq offers a team-oriented, stimulating work environment. Competitive compensation, benefits and stock options are offered. Please mail, email or fax your resume with cover letter to:

Spaltudaq Corporation
Seattle Life Sciences Building
1124 Columbia Street, Suite 300
Seattle, WA 98104

“Spaltudaq” is from the Lushootseed dialect of the indigenous Coast Salish people of Puget Sound and means “spirit canoe ceremony”, a practice once performed to prevent those stricken with disease from dying prematurely. Spaltudaq is founded on this challenge of helping those who are sick, particularly those individuals living with cancer and life-threatening infections. For more information, please visit: www.spaltudaq.com Spaltudaq Corporation is an equal opportunity employer.
