

SPALTUDAQ

Spaltudaq Corporation, a privately-held biotechnology company based in Seattle, is focused on developing novel tumor-specific therapeutic antibodies for the treatment of cancer and infectious disease. The company's technology harnesses the power of the human immune system to identify tumor-specific or pathogen-specific monoclonal antibodies from human tissue samples. Come join a company on the move!

Sr. Scientist, Molecular Biology

Spaltudaq Corporation is looking for a talented Senior Scientist with a strong background in Molecular Biology and Mammalian Protein Expression to join a group doing antibody discovery. Responsibilities will focus on the cloning and expression of antibodies from human B-cell repertoires. The successful candidate will be self-motivated, creative, enthusiastic and enjoy working as an integral part of a diverse team of scientists and in a fast-paced environment.

Qualified candidates must possess a PhD in Biochemistry, Molecular Biology, Genetics, Bioengineering or equivalent field (BS or MS plus minimum 14 years experience), with a minimum of 8 years experience inclusive of post-doctoral training and appropriate research / development training (significant industry experience is highly preferred); experience with current molecular biology techniques of cloning, PCR, mutagenesis and sequence analysis including the use of corresponding software such as Accelrys, Vector NTI, or BioEdit; staff training and supervisory experience; excellent organizational and communication skills along with the desire to work within a multidisciplinary team; and familiarity with standard laboratory safety procedures and documentation.

Spaltudaq offers a team-oriented, stimulating work environment. Competitive compensation, benefits and stock options are offered. Please mail, email or fax your resume with cover letter to:

Spaltudaq Corporation
Seattle Life Sciences Building
1124 Columbia Street, Suite 300
Seattle, WA 98104
fax: 206-805-1699
email: careers@spaltudaq.com

“Spaltudaq” is from the Lushootseed dialect of the indigenous Coast Salish people of Puget Sound and means “spirit canoe ceremony”, a practice once performed to prevent those stricken with disease from dying prematurely. Spaltudaq is founded on this challenge of helping those who are sick, particularly those individuals living with cancer and life-threatening infections.
